Professional Skills

- Unreal Engine
  - Unreal C++
  - Blueprints
  - Widgets (UI)
  - Behavior trees
- Godot
- Programming languages:
  - C++
  - Flutter
  - Python
  - HTML/CSS/JS
  - OpenGL
- Game Development:
  - Blender
  - FMOD
  - Ren'Py
- Agile / Scrum (Jira)
- Version control (git)
  - BitBucket
  - Gerrit
- TeamCity & Jenkins (CI/CD)

Languages

- Polish (native)
- English (C2)

Hobbies

- Working with Unreal Engine 🔥
- And Godot recently 🔵
- Having good gym workout 🦾
- Eating tasty food 🍣🍗🍲
- Drawing 🎨
- Playing video games 🎮
- Playing ttrpg (DnD, WtA) 🐉

Profile

Hey, I'm a gameplay-focused programmer who enjoys building and experimenting with mechanics. Most of my experience comes from university projects, game jams, and hobby projects where I've worked on player systems, interactions, and other gameplay features. I enjoy the iterative side of game development — prototyping ideas, tweaking them until they feel right, and structuring systems so they're flexible and easy to build on. Gameplay programming interests me most because it sits right between code and design, and its fun seeing something go from a small piece of code to a mechanic that actually works in the game.

Education

IT University of Copenhagen (ITU)
Sep 2021 – Jun 2023
Master of Science in Games, Technology Track

National University of Singapore (exchange semester)
Aug 2019 – Dec 2019

University of Southern Denmark (SDU)
Sep 2017 – Feb 2021
Bachelor of Engineering in Mechatronics with profile in Embedded Systems

Experience

Software Developer at EPOS Location: Ballerup, Denmark
June 2025 – present
- Maintaining and developing features for web app in Flutter
- Developing features in modern C++ for our internal API
- Test system management with Jenkins / physical set up

Software Developer Oticon (full-time) Location: Smørum, Denmark
Aug 2023 – June 2025
- Creating and optimizing build systems in make
- C++ embedded software development
- Manual testing with hardware

Junior Software Developer at Oticon Location: Smørum, Denmark
Sep 2022 – Jun 2023
- Migrating projects from Perforce to Git (C++)
- Writing unit tests in Gtest framework (C++) and pytest
- Continuous integration (TeamCity)

Projects

Master Thesis – Game feel of playing as non-human character (Unreal Engine 5.0)
- Implement custom character movement state machine in Blueprints
- Design and implement character's abilities
- Research Game Feel

Narrative-driven adventure game — "Amnesty of the Exiled" (Unreal Engine 4.26)
- Design and UI implementation (in-game journal, blueprints)
- Narrative design, concept art, level design, and scripting
- Project management

Rogue-like — "Under the Bed" (Unity)
- Gameplay design and implementation (character controller)
- Sound design and implementation (FMOD and Reaper)

Procedural Lightning Strike Generation (OpenGL)
- Implementation of post-processing effects (bloom, blur)
- Vertex, fragment, and geometry shader
